BORA X BO

The professional steam oven for the home.

Fresh air and clear view

Retain a clear view at all times: the BORA X BO stops you getting a face full of steam when you open the door. Its automatic steam extraction function draws the steam backwards before the door is opened – dehumidified, cooled and filtered. The odour filter even minimises the strong smell typical of fish. Thanks to the multilevel LED lighting, you can see your food through the glass pane in the door in realistic colours – on all three levels.

Simple cleaning

Your oven chamber is dirty? No problem! The BORA X BO makes life easier for you with both an intensive cleaning and a drying programme – so you don't even need to wipe it dry afterwards! The two-chamber cartridge cleans the oven chamber spotlessly without the slightest effort – just like the plates and cups in your dishwasher!

Design

Its black frame and minimalist design make the BORA X BO a work of art. The display uses impressively clear iconography and integrates seamlessly into the attractive overall picture, which is also enhanced by the stylish stainless steel oven chamber.

Simple operation

The BORA X BO is controlled via a huge 19-inch touch display that can also be tilted if necessary. The touchscreen simply responds to the touch of your fingertips, just like a smartphone. Numerous preset programmes and an intuitive user navigation make cooking as easy as pie!

Top performance / Best cooking results

As good as it gets: the BORA X BO stands out thanks to its particularly uniform cooking results and its optimum heat distribution. Your meals will come out perfectly, even when you use all three levels at once. For example, if you bake lots of croissants at the same time on three baking trays, they will all turn out equally good!

BORA multi-drawer

The universal genius.

Minimalist design

The BORA multi-drawer's scaled-down 'All Black' design focuses on the bare essentials. You have two choices for the handleless front: you can either adapt its look to your existing kitchen units so that it blends seamlessly into your kitchen architecture or you can use the BORA glass front panel, which has the same elegant design as the BORA X BO.

Simple cleaning

All of the BORA multi-drawer's surfaces are easy to access and therefore quick to clean. The sophisticated design has no sharp edges or joints, so everything is sparkling clean again in a flash.

Best materials

Best quality: the BORA multi-drawer is exclusively made with carefully selected materials. The refined metal components and black glass base ensure durability and robustness. All workmanship is of the highest quality, so you can enjoy your BORA multi-drawer for many years to come!

Intuitive operation

Simply tap the user-friendly touchscreen to select the desired programme from the presets – or set the temperature and heating duration individually. If networked with a BORA X BO, the BORA multi-drawer can also be controlled via its display.

Best performance

The BORA multi-drawer's presets make it extremely versatile: you can use it to pre-heat plates and dishes, cook at low temperatures, regenerate or defrost food, or simply to keep meals warm. When using the deeper version of the BORA multi-drawer, you can even work on two levels, helping you perfectly conjure up even demanding menus!

BORA multi-drawer accessory: shelf rack

The BORA shelf rack can be used to heat up food that requires a lower temperature than the dishes heated on the BORA multi-drawer's heated glass base. Perfect for heating baby food, marinating dishes or for meals that you want to serve warm rather than hot!

BORA S Pure

A surprising number of options.

Design

Minimalist design with flush integration: the BORA S Pure is a win for every kitchen! The asymmetrical position of the extractor opening is particularly eye-catching, giving the cooktop an extraordinary and modern look – further heightened by the discreet operating panel with intelligent lighting.

Simple operation

Only with BORA can things be this simple: the touch slider allows you to easily operate the BORA S Pure with a tap or a swipe up or down of your finger. All key operating functions can be effortlessly accessed in just a few touches.

Simple cleaning

Thanks to the large, easily accessible extractor opening, all BORA S Pure parts that come into contact with cooking vapours can be simply removed for cleaning. What's more, they take up little space in a dishwasher, so cleaning a cooktop extractor couldn't be any more convenient!

Fresh air and clear view

The integrated extractor on the BORA S Pure cooktop fully draws away vapours and odours while cooking from precisely where they are created. If the automatic extractor function is activated, the power adjusts to the amount of steam generated during the current cooking process. There is no need for manual intervention, so you can fully focus on cooking.

Best performance

Sophisticated technology for top performance: thanks to the induction coils specially developed for BORA, the entire cooktop surface can be optimally used. The four cooking zones of different sizes can accommodate pots and pans of all conventional dimensions. What's more, with its quiet fan, the extractor is barely audible even on high power.

Maximum storage space

At under 200 mm, the low installation height and the integrated recirculation filter unit guarantee maximum storage space for pots, pans and other kitchen utensils in the cupboard below. Even in 60-cm-deep kitchen units, no drawers need to be shortened in recirculation mode. A change from the norm.

Technical data

- Dimensions:
(Width x height x depth)
1000 x 960 x 780 mm

Changed installation clearance

For all compact appliances.

Following a detailed review, we have reduced the installation clearance from the cabinet above from 600 mm to 480 mm for all compact appliances. This information has already been incorporated into the manuals and will also be included in the planning guide in future.

Allow the necessary clearance around the worktop cut-out.

- 1 Necessary clearance
- 2 Worktop cut-out

BORA grill pan

KWGPF1

BORA grill pan for surface induction

Available to order from 1/1/2023

- Optimally designed for BORA surface induction cooktops: BORA Professional, Classic, X Pure, Basic surface induction and previous models with surface induction
- Oven safe up to 250°C
- Silicone base pads prevent the glass ceramic from getting scratched
- Simple to clean and easy to remove food remnants thanks to high-quality non-stick coating

Scope of delivery

- BORA grill pan KWGPF1
- 4 x silicone base pads
- Instructions for use

Technical data

- Dimensions:
(Width x height x depth)
469 x 270 x 60 mm
- Weight: 2.6 kg

Design

With its pared-down design, the BORA grill pan fits in with the BORA product aesthetics.

Compatibility

The BORA grill pan is the perfect addition to your BORA product range. Technically, it is optimally designed for surface induction cooktops. Thanks to its size and quality, it can also be used in the BORA X BO.

Quality

The cast aluminium grill pan features a high-quality non-stick coating and distributes heat rapidly thanks to its processing. The non-stick coating makes the pan easy to clean and ideal for preparing low-fat meals.
