

Shower enclosure

Program

Aus Liebe zum Duschen.

Your Kermi shower is a special place. Even though it's just a single pane of glass separating you from the outside, all of a sudden the troubles of the world seem miles away. Immerse your senses and enjoy the moment. Gather energy and leave the stress of the day behind, or just take a deep breath. At Kermi we devote all our knowledge and experience to make this moment a special one for you.

Hello World! I am now ready again for you.

**MADE IN
GERMANY**

Quality at first glance. And at second.

Your KERMI shower enclosure is not just a real eye-catcher. In addition to high-quality materials, its intrinsic values are also convincing. For instance the strong construction that withstands the demands of a family's everyday life. You can rely on our certified quality concerning major as well as minor aspects. Tested quality of KERMI gives you the security of a complete high-quality, long lasting product. For instance this is demonstrated by the TÜV certification for stability, splash water tightness and easy care or the fact that all glass elements comply with the highest requirements according to the single sheet safety glass standards. Perfection is the main focus during the processing as illustrated by the comprehensive quality, environment and energy management. Additionally, we also offer a 20 years guaranteed availability on all spare parts after discontinuation of a model. First-class shower culture made in Germany, for more than 50 years.

Ergonomic handle design.

Hardly any design element would define the optic of your shower enclosure so clearly as the handle. It is also as important that it fits exceptionally well in the hand. Almost all KERMI handles are rounded hand-friendly and are therefore resilient and robust.

Anodized aluminum profiles.

Aluminum profiles from KERMI are always anodized. Due to this "protective layer", the profile is smooth and closed. It is resistant to wear and abrasion. This also applies if the profile is color powder coated.

Solid metal hinges.

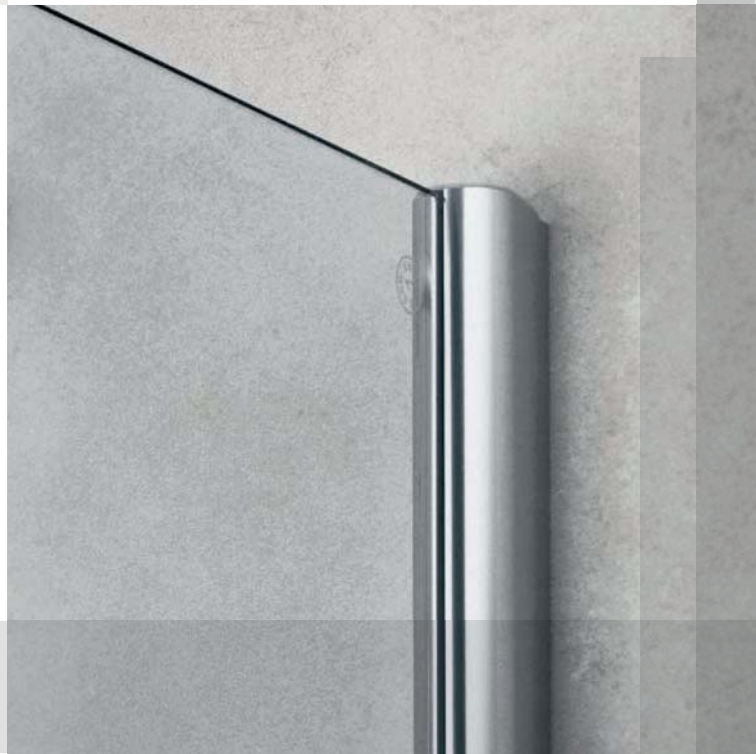

Outside elegant, inside robust. This is how a high-quality hinge should be. KERMI hinges are already reliably factory mounted and are easy to maintain. Even after years, the doors still run smoothly and close gently. This is also ensured by the integrated rising hinge mechanism. Additionally, KERMI hinges are integrated on the inside of the glass.

Tough tests.

KERMI shower enclosures provide outstanding durability. The glass must withstand pendulum tests with heavy sand bags without breaking and falling out of the frame. During the endurance tests, doors are opened and closed again and again. Only after the construction withstands all exertions, it can become a KERMI.

Single sheet safety glass (ESG).

Heat-treated glass has a much higher level of shock and impact resistance than untreated glass. Only high quality single sheet safety glass (ESG) certified according to DIN EN 12150 is used in the KERMI real glass shower enclosures, depending on the requirement in the thickness 8 mm to 3 mm.

What is the feeling of the door handles in the hand? What is the room experience inside the shower enclosure? And how does the door sound when it closes? Design aspects play an important role in your shower experience. See, hear, feel - everything must match perfectly. Our designers ensure this with lots of sensibility. This has led to a high variety of contemporary and classical shapes for KERMI. Honoured with international design awards.

Design connects.
The useful with the beautiful.

Who seeks will find.
The innovative solution.

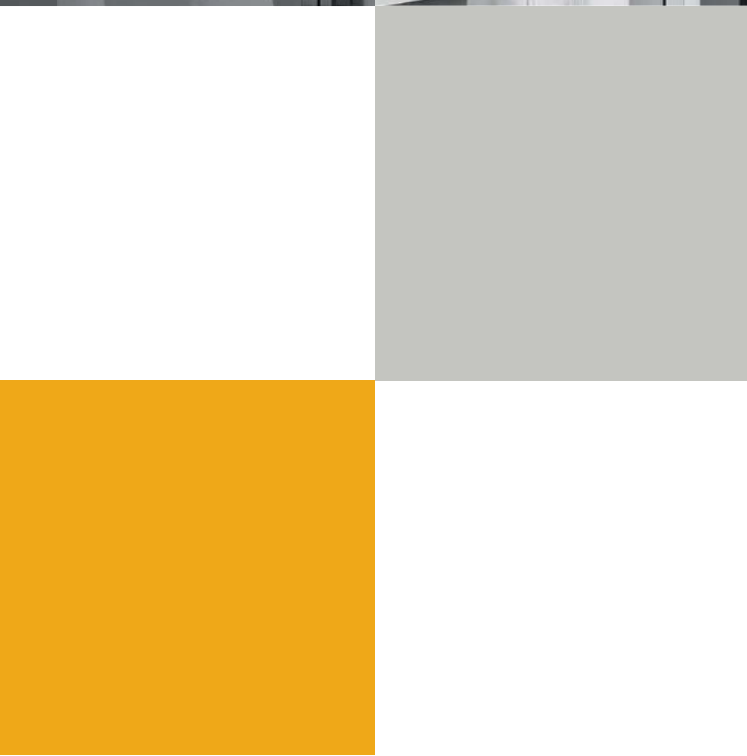

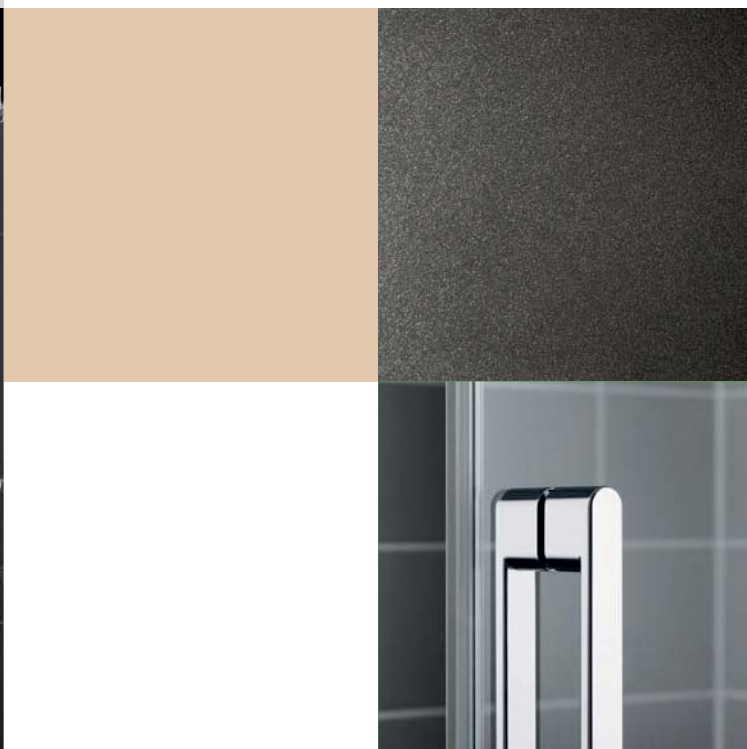

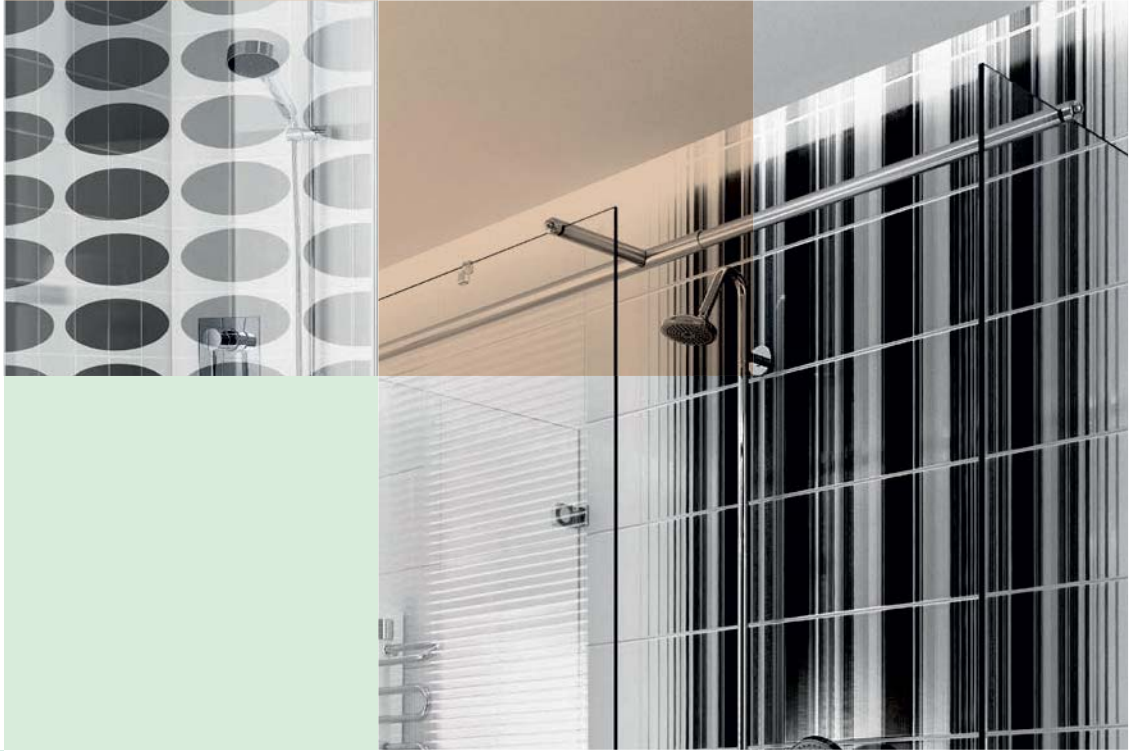

Your daily life is always an inspiration for our new products and innovations. For instance the retractable door handle. Movable side panels. Or the certified glass coating KERMIclean for more ease of care. But even the unique rising hinge slide mechanism for more splash water tightness is a part of it. Always new ideas are added to make your shower experience more perfect. The Diga series with the hinged doors, which can be folded to the wall and thus "disappear" completely. For maximum freedom of movement even in the smallest room. The idea was honored with a universal design award and the universal design consumer favorite 2010. Or the flattest shower space system for a floor level shower comfort even there where nobody would have considered it to be possible.

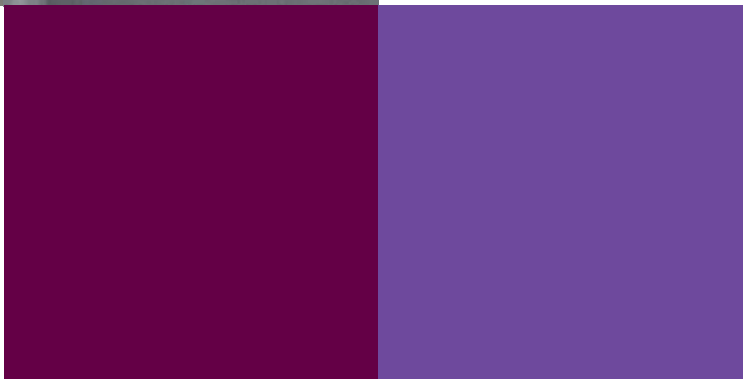

Make your bathroom to a unique place! With sand-blasted glasses or mirror glasses and with colorful profile, hinges and handle accents. You have the choice between sanitary colors and many other color themes. For the handles you enjoy freedom of choice. We also develop completely individual solutions for your shower enclosures.

More from page 186.

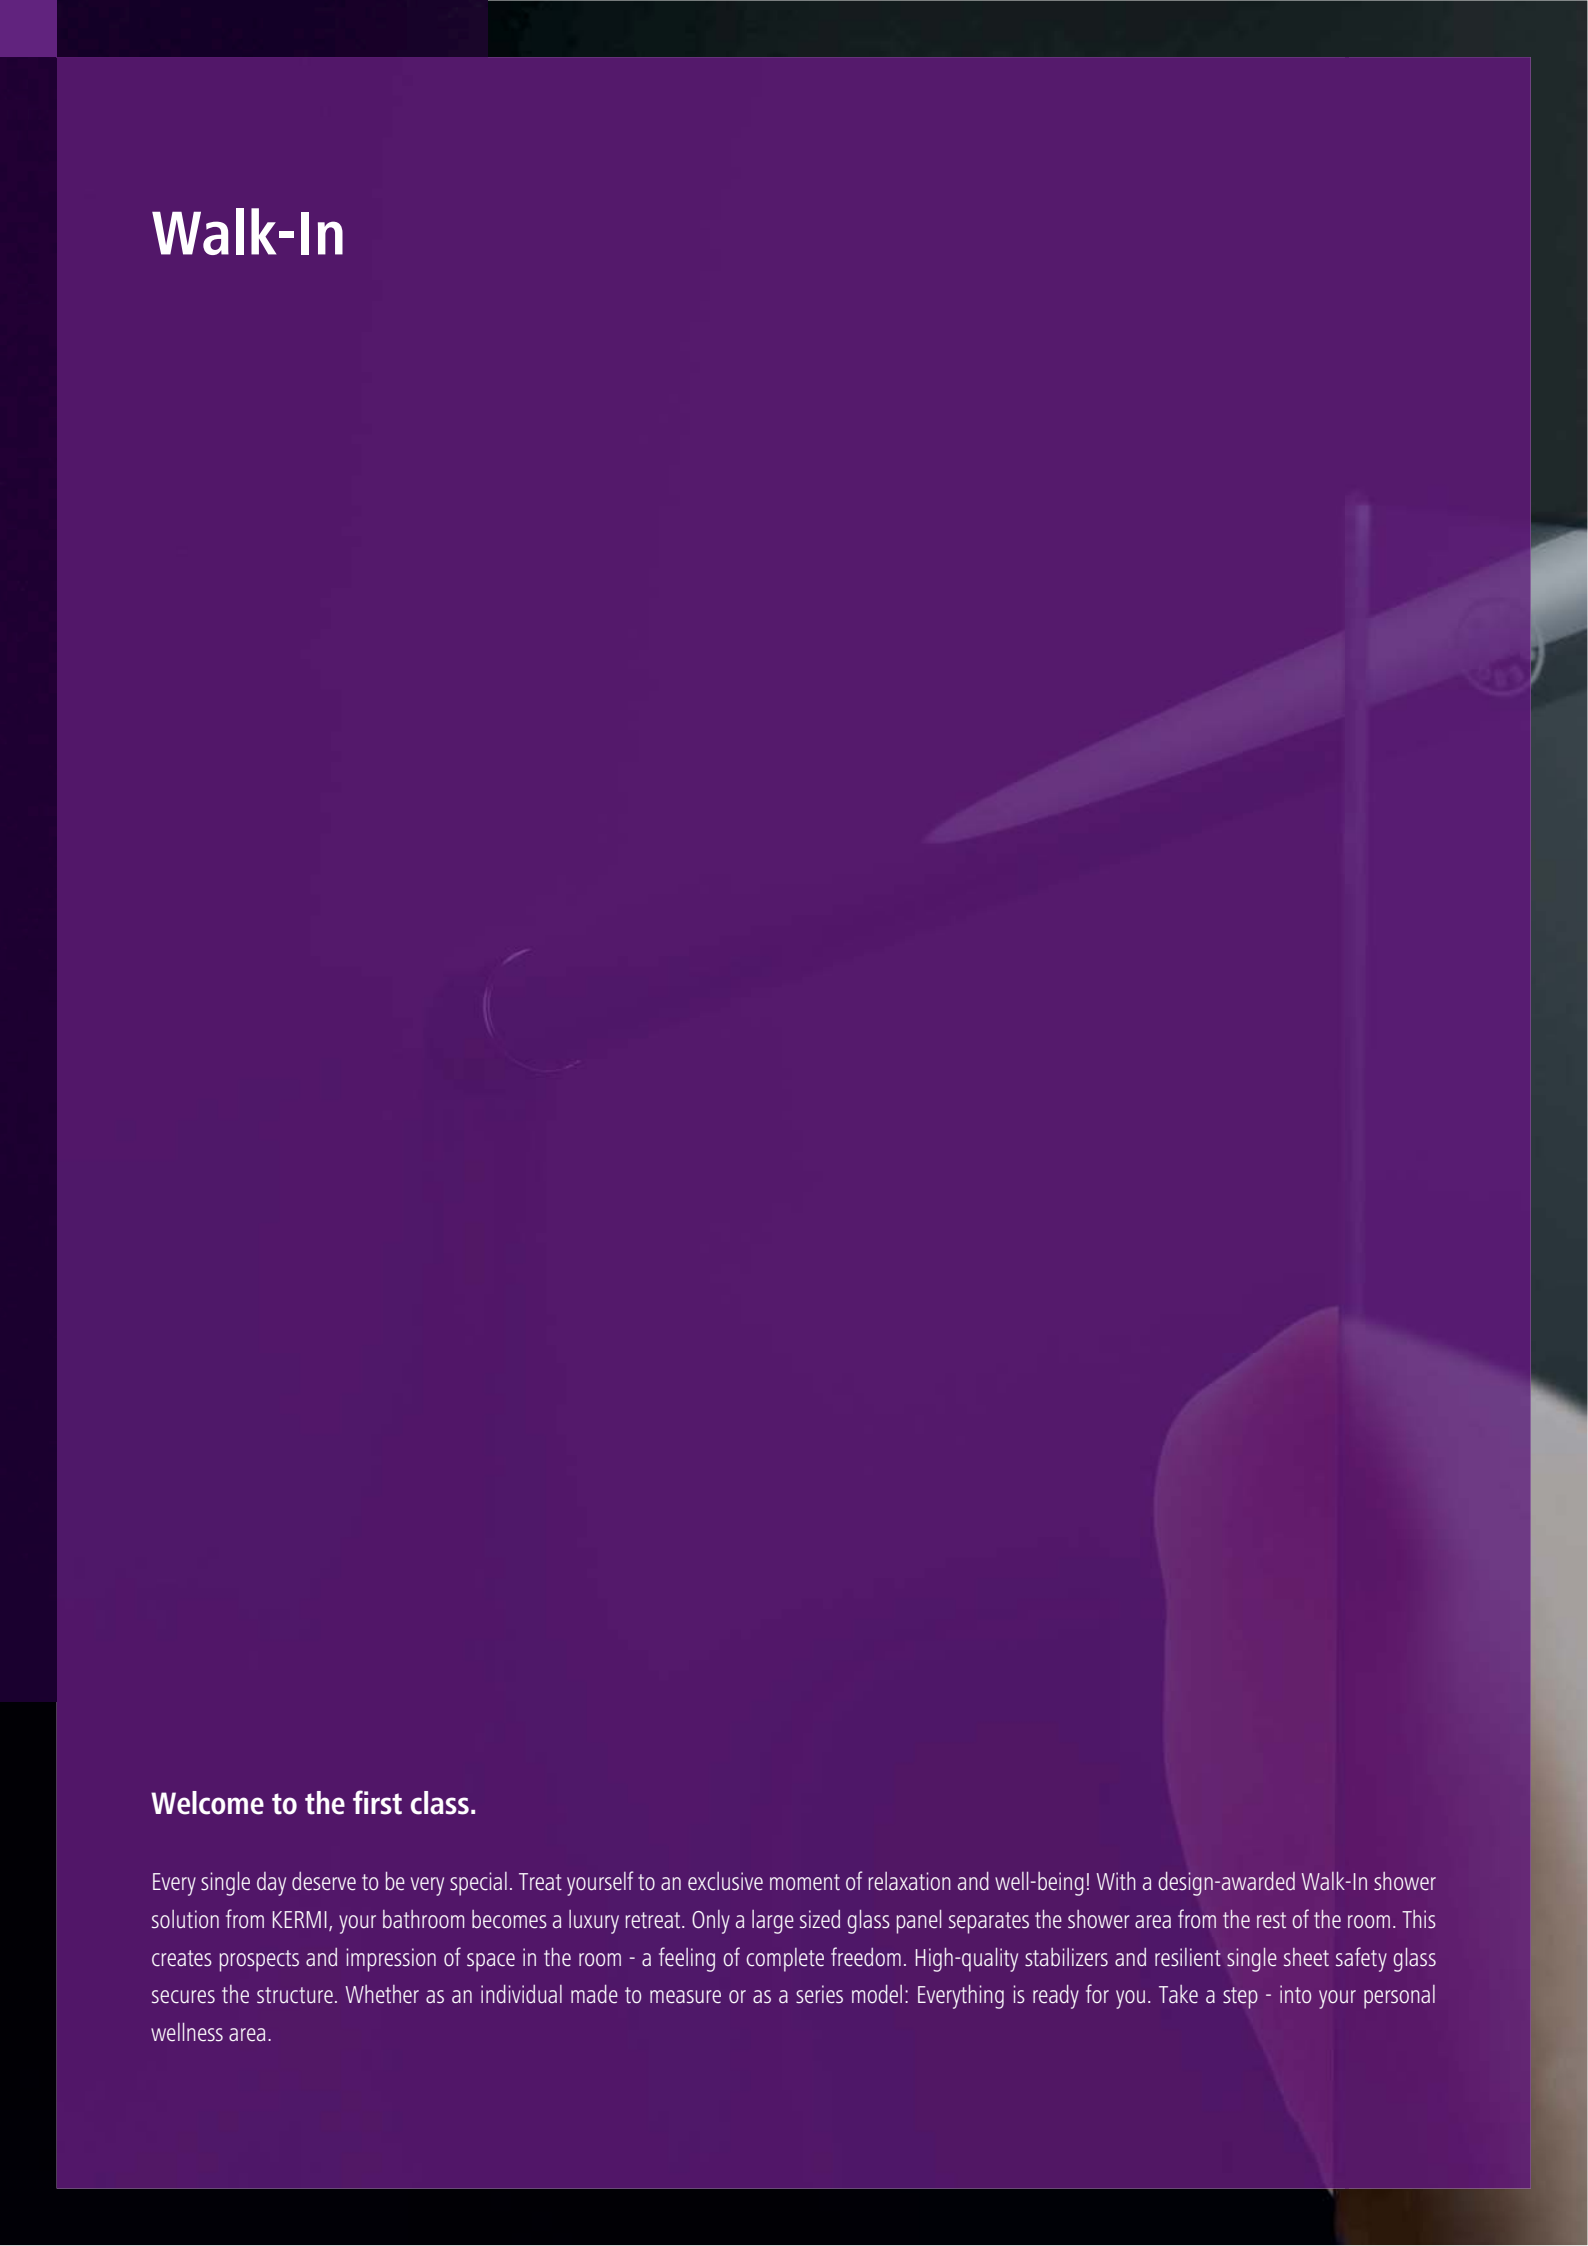

Every shower enclosure is unique.
With KERMI**extra.**

Walk-In

A large, minimalist walk-in shower enclosure is shown against a dark background. The enclosure features a single glass panel and a curved glass door. The glass is held in place by a curved metal frame. The overall design is sleek and modern.

Welcome to the first class.

Every single day deserve to be very special. Treat yourself to an exclusive moment of relaxation and well-being! With a design-awarded Walk-In shower solution from KERMI, your bathroom becomes a luxury retreat. Only a large sized glass panel separates the shower area from the rest of the room. This creates prospects and impression of space in the room - a feeling of complete freedom. High-quality stabilizers and resilient single sheet safety glass secures the structure. Whether as an individual made to measure or as a series model: Everything is ready for you. Take a step - into your personal wellness area.

Walk-In XS FREE (with wall supports), with grey tinted single sheet safety glass ESG

WALK-IN XS

Open for your wishes.

With the Walk-In XS, you can also find tailor made solutions in the award-winning designs for your exclusive wellness bath. Select your favorites from 26 models and numerous variations. Whether flush with the wall or free-standing, with high quality wall or ceiling stabilizers in elegant round pipe design, with or without door elements - you have the choice. Additionally, safety which can be only offered by an 8mm thick, impact-resistant single sheet safety glass according to EN 12150. Now experience your new showering sensation!

Exclusive round pipe design. Elegant, slim, absolutely stable and on the inside flush with the glass. For comfortable ease of maintenance and maximum stability and safety.

WALK-IN SERIES MODEL

Small room. Really big.

Why should you restrict yourself to a small bathroom in your personal design options? With the numerous Walk-In series models, you can get fascinating room effect even with limited space. The open, transparent design gives your bathroom new generosity. Of course with high-quality single sheet safety glass as well as in individual versions. Free-standing, one-side accessible, with or without glass panel elements. Precisely made to measure or in series. Stylish hinges, elegant profiles, creative surface design. Your creativity decides!

Hinge

Less is more.

Your Kermi shower enclosure stands for itself. It does not need any frills to be effective. Only you can decide the extent to which you would go to reduce the means. Puristic variants: completely frameless design tailored precisely to the millimeter for your bathroom situation. High-quality metal hinges and door handles are particularly well shown to advantage. Your shower enclosure get more optical "fixation" with the partially framed XP series versions available in many standard dimensions. The wall profile is screwed invisibly and ensures easy compensation of width and inclination. Whether shower bathtub or elegant KERMI shower space, the design fits perfectly on any subsurface. Select your model from the complete design range!

PASA

Puristic exclusivity.

You like clear geometrical shapes and get convinced with the intelligent functions? You would not like to compromise with regard to material and even the maintenance of your hinges should be easy? Then Pasa is in line with your requirement. Flat, organic soft hinges in shiny chrome or matter silver looks are expressive eye-catchers. The slim handle bar with ergonomic design is comfortably in your hand. The hinged doors can be opened inside as well as outside. Awarded design, produced made to measure.

Pasa two part hinged door

Above left: Pasa handle, convincing in haptics and aesthetics

Above right and below left: Pasa hinge with pivot comfort

Below right: hinge technology completely integrated on the inside of the glass

Pasa hinged door with fixed panel and side panel and optional towel rail

Not just beautiful. But also intelligent.

Good appearance is one thing. But Pasa is much more. The comfortable hinged door has a rising hinge mechanism for gentle door closing even for floor level installation. Hinges flush with the surface on the inside can be cleaned easily. Our suggestion: Select **KERMiclean** easy care coating for your real glass. The extra smooth surface coating with "Teflon effect" ensures that e.g. water drops, soap residues or dirt cannot stubbornly deposited at all.

Gia swing door with fixed panel and side panel

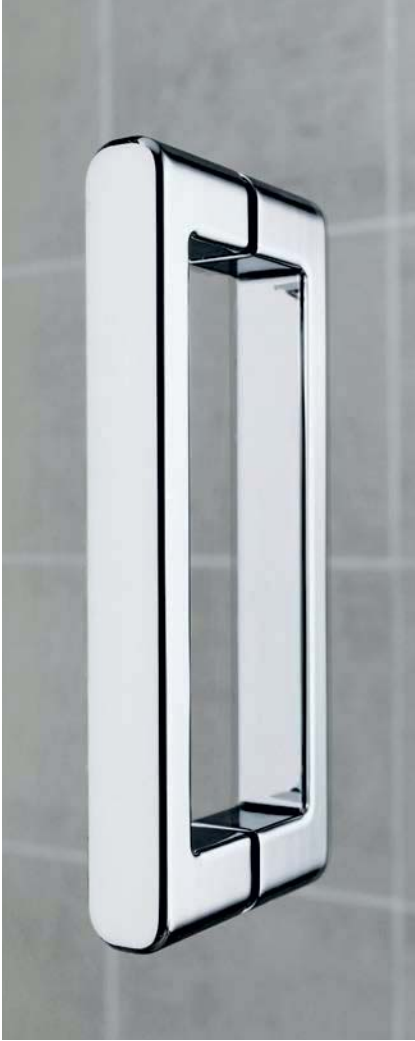

GIA

Sensous elegance.

Your bathroom is an experience for all the senses. You feel most comfortable with a gently rounded design? Nevertheless, it should not look playful. Exactly, this balance between sensuality and clear form is offered by the Gia series. This includes rounded hinges, brilliant surface finish and a handle that flatters your hand at every touch. Harmonious shapes in balance with high-quality real glass shower enclosure. You can enjoy it for a long time. And less maintenance effort. This can be ensured by flat integrated hinges on the inside of the glass. Every Gia shower enclosure is produced made to measure especially for your bathroom.

Pasa XP hinged door with fixed panel and side panel

PASA XP

Puristic exclusivity. Partly framed.

You wish to have a pure real glass look with an appropriate frame by means of elegant profiles and hinges? Welcome to the world of Pasa XP! The clear but soft form of the hinges and the ergonomical shaped handles distinguish the Pasa design. Characteristic of the XP version: Decent wall connection profiles with invisible screw connections. Hinged doors swiveling inside and outside offers you maximum freedom. An awarded design that ideally fits into your bathroom situation due to an intelligent adjustment system.

Convincing in haptics and
aesthetics

Pasa XP hinged door with fixed panel

Pasa XP pentagon shower enclosure (hinged doors with fixed panels)

Shape. Function. Freedom.

True values of Pasa XP appear in the details. Hinged doors, which thanks to the rising hinge mechanism, are convincing by a silky-smooth door action, also for floor level installation. And a nice feeling of having to spend less time on maintenance. Ensured by hinges which are totally flat on the inside of the glass.

Pasa XP two part corner entry (hinged doors with fixed panels)

The circle is completed here.

Space saving and fascinating, innovative design: The semicircle shower enclosure (hinged doors with fixed panels) in combination with the semicircle shower space Line with off-set drainage. Doors can be pivoted on the wall to save space. This creates optical generosity even in small bathrooms, honored with the universal design and the universal design consumer favorite.

GIA XP

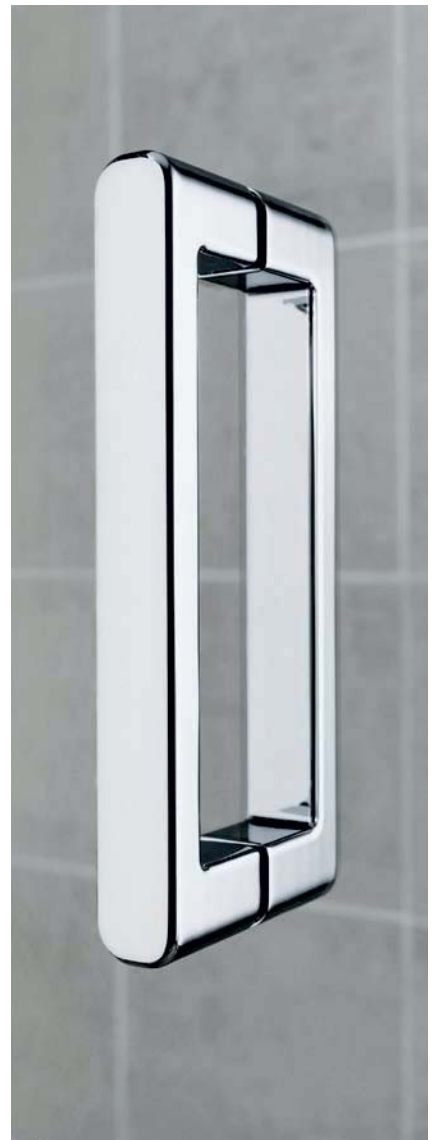

Sensuous elegance. Partly framed.

Your bathroom should exude warmth and sensuality - a place where you can feel at once comfortable. Gentle curves of Gia combined with timelessly elegant lines offer what you are searching. The wall connection profile which is a characteristic of XP gives full support without interfering. The screw connections are concealed, the surface finish is brilliant and in perfect harmony with your real glass shower enclosure. Another advantage is its easy care. Due to inside flat hinges, only wiping is sufficient and your shower enclosure shines again. Gia XP would also match your bathroom due to an intelligent adjustment system. It does not matter whether it is a KERMI shower space or shower tray.

Gia XP quadrant shower enclosure (swing door with fixed panels)

Above: Harmonious wall connection profile with brilliant surface finish. Below left: Gia XP hinge. Below right: bow-shaped handles inside and outside

Sensitive customization.

Size is not a question of square meters only. Gia XP shows its qualities even in restricted spaces. With the adjustment system which is accurate to the millimeter, Gia XP provides enough space to fit exactly in your bathroom. Moreover, the classical design is in harmony with all faucet and ceramic designs.

Filia XP two part corner entry (hinged doors with fixed panels)

FILIA XP

Linear aesthetics. Partly framed.

Each day should be exceptional, this is your conviction. This becomes true with Filia XP – at an exceptionally reasonable price. Look forward to linear hinge design, puristic bow-shaped handles, high-quality real glass and astonishing functions. As for all XP models, the wall connection profiles are screwed invisibly even here. Due to the intelligent adjustment system, Filia XP fits perfectly, whether on your KERMI shower space or on your shower tray. The hinged door design that opens inside as well as outside is also a characteristic. Welcome every day with maximum freedom of movement!

Profile

A matching frame for your wellness ritual.

Whether an invigorating freshness kick or an extensive feel-good moment. Whether with bath gloves, sponge or neat. Whether in the morning or evening. Showering habits vary from person to person. Equally individual should be the place where you take care of your daily routine. The profile program from KERMI offers you every freedom. With high-quality single sheet safety glass or plastic glass Kerolan. Smooth or with structure. Transparent or with discrete visibility. In addition to this end, a sturdy construction that withstands the rigors of the daily life. And a high-quality profile from anodized aluminum. How should your wellness area look like? We shall mutually find an appropriate solution – for your bathroom and your budget. If your bathroom situation is very tricky and special production becomes necessary, you are in the best hands with KERMI.

DIGA

Great freedom of movement.

When you enter your shower enclosure, you should feel good at once. As though someone had only thought of this particular moment when developing the design. And it's true, as Diga is based on the principle of universal design. Whether young or old, small or big bathroom, whether physically fit or with certain restrictions - this model offers maximum comfort to all. For instance through the pleasant looks of the ergonomic metal handles. Or the timeless, simple and straight design. And primarily because of the great freedom of movement that Diga offers. Due to the hinged doors or the combination of hinged and folding doors with agile profiles and hinges. Awarded design especially for your bathroom. Especially for you.

Diga hinged doors with folding mechanism honored with

Diga two part corner entry (hinged doors with folding mechanism)

Handle
Hinge
Hinged wall profile

Diga hinged door with folding mechanism and side panel

Diga two part hinged door

Diga hinged door and fixed panel

Successful niche supplier.

Diga is highly flexible even in small rooms as proven by the hinged recess solution. The doors can be moved inside and outside by 90°. Due to the rising hinge mechanism the door is running smoothly and closes gently.

Diga hinged door with folding mechanism and fixed panel (closed)

Diga hinged door with folding mechanism and fixed panel (opened)

Diga hinged door with fixed panel and movable side panel

A design that moves.

Sophisticated design is not just beautiful. It also gives clever answers. For example to the question, how great comfort can be realized within a confined space. To this end, we have developed particularly agile door constructions. The hinged wall profile has an action radius of 90° to the inside and outside, in the hinge 180° to the outside. For a free entry, easy care and practical space saving. Due to **KERMIextra**, an additional handle is also feasible on the movable side panel. Your Diga shower enclosure can thus become even more comfortable.

All hinged doors with folding mechanism and the movable side panel are optional with additional handle via **KERMIextra** - for ideal two-hand operation and more comfortable opening and closing

Highlights

Rising hinge mechanism in the hinged wall profile

Rising hinge mechanism in the hinge

Special horizontal sealing strip in form of a gutter

Hinges completely flush on the inside of the glass

Highlights.

Sophisticated functions make your KERMI shower solution an all-round successful experience: Doors which operate perfectly even after opening them thousand times and close almost silently. Easy care, brilliant material and consistent haptics and optics, for instance for the optionally installed towel rail. And many practical showering ideas. As for example the freely positionable towel hooks. Or the stabilisers with which you always have your shower accessories ready to hand.

Typical Diga: innovative version with hinged door and with folding mechanism for saving space and easy care hinged comfort.

Transparent towel hook. Optional: towel rail

Elegant stabilizer with additional function

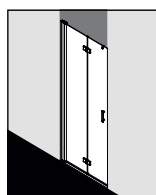

Can be installed with or without a small floor sill

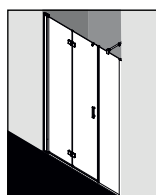

Direct bathtub connection

Atea two-part corner entry (hinged doors with fixed panels)

ATEA

Standard comfort.

You certainly want a showering solution with extra comfort. One that gives you lots of freedom of choice and also confidently overcomes tricky room situations. That is exactly what Atea does. The gently rounded profiles and "Open at the top principle" of the hinged doors is a characteristic of this series. Without horizontal profiles it results into more entry freedom and a generous appearance. High-quality single sheet safety glass provides strength and brilliant transparency. Atea can also be realized as a floor level solution, for instance in combination with a KERMI shower space. You thus get a best, trendy, consistently brilliant bathroom design at an attractive price.

In combination with
KERMI shower space

Hinged door handle

Sliding door handle

Wall profile

Everything well thought.

Listen very carefully. Not heard? Excellent! The transparent magnetic profiles and the rising hinge mechanism ensure gentle, almost silent door closing. In case of turbulences of your everyday life, no problem: The standard stabilizer can easily cope with it. The optional **KERMclean** easy care coating is the first choice for a quick shine after the shower.

Atea one part hinged door

Atea two part corner entry off-floor (sliding doors)

Open for your preferences.

Whether pleasant hinged comfort or space saving sliding doors, accessible at floor level, with unique rising hinge sliding mechanism for more spray water tightness. Even the recess shower solutions with the intelligent entry system appear to be more spacious - with or without fixed panels.

Atea two part sliding door off-floor with fixed panel

Atea two part hinged door

Atea quadrant shower enclosure (hinged doors with fixed panels)

Atea quadrant shower enclosure (sliding doors)

Highlights

Rising hinge mechanism for almost all doors

Special horizontal sealing strip in form of a gutter

Rising hinge sliding mechanism for spray water tightness

Smooth, easy to clean and sturdy profiles

Highlights.

Sophisticated functions make your KERMI shower solution an all-round successful experience: Doors which operate perfectly even after opening them thousand times and close almost silently. Easy care, brilliant material. Consistent haptics and optics. And many practical showering ideas. For instance the stabilizers with which you always have your shower accessories ready to hand.

Typical Atea: trouble-free customization to individual measurement requirements at a reasonable price.

Optionally with towel rail

Clean solution for convenient maintenance

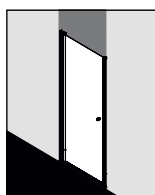

Can be installed with or without a small floor sill

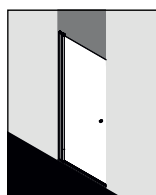

Direct bathtub connection

RAYA

A flexible trendsetter.

You appreciate straightness. In your design as well as in the price. A modern, floor level solution would exactly suit your taste. Finally you can enjoy more freedom even in a small space! For this Raya is perfect: In combination with a KERMI shower space, your showering pleasure gets a totally new significance. Hinge with linear shapes, smooth profiles and a ergonomic handle design responds to all senses. Even in function, Raya is unbeatable. Thanks to the hinged door technology with rising hinge mechanism and an intelligent adjustment system that perfectly matches your KERMI shower space or shower tray. To this end, the high-quality single sheet safety glass. Exclusive design at an incomparably reasonable price.

Raya two part hinged door

Linear profile, hinge and
handle design

Raya hinged door with fixed panel

Raya two part corner entry (hinged doors with fixed panels)

Raya hinged door and side panel

Raya corner entry (hinged doors)

A perfect balance.

Raya follows clear directions for design and function. Due to the unique adjustment system, your model perfectly matches to your room situation. 10 mm adjustment in the wall profile, 20 mm invisible adjustment in the hinge is possible. The hinged doors have an action radius of 180° and can be swiveled to the inside as well as outside, for complete freedom of entry and optimal ventilation. Due to the rising hinge mechanism, the door action is smooth and close gently.

Scores with unique design.

The special combination of Raya semicircle shower enclosure and semicircle shower space Line with an off-set drainage convinced not only our customers but also the design jury. It can be folded to the wall to save space and thus opens the room.

Raya semicircle shower enclosure (hinged doors with fixed panels)

Highlights

Rising hinge mechanism for all doors

Special horizontal sealing strip in form of a gutter

Smooth, easy to clean profiles

Intelligent adjustment system

Optionally with towel rail

Elegant stabilizer with additional function

Can be installed with or without a small floor sill

Direct bathtub connection

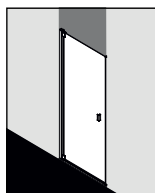

Highlights.

Sophisticated functions make your KERMI shower solution an all-round successful experience: Doors which operate perfectly even after opening them thousand times and close almost silently. Easy care, brilliant material. Consistent haptics and optics. And many practical showering ideas. For instance the stabilizers with which you always have your shower accessories ready to hand.

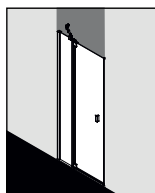

Typical Raya: intelligent adjustment system for adapting to your individual room situation.

Liga hinged door with fixed panel and side panel

LIGA

Welcome to the first Liga.

Liga is so variable that it offers an optimum solution for virtually every shower situation. Of course also for yours. This series is the best evidence that cutbacks in terms of quality and design are not necessary even at lower budgets. All important parts are produced from metal. Like the ergonomic bow-shaped handles which facilitate the usage in the daily life. All hinges and handles are high-quality chrome-plated. By the way: it also looks fabulous.

Handle
Hinge
Hinged wall profile

Liga one part hinged door,

Liga two part corner entry (hinged door with folding mechanism and hinged door with fixed panel)

Liga two part corner entry (hinged doors with folding mechanism)

Adapts perfectly. Without losing its profile.

Due to its variability, Liga ideally matches to the room conditions of your bathroom. For example, you have the choice between hinged door, hinged door with fixed panel or hinged door with folding mechanism. Even during installation, Liga offers many creative solutions whether tension rod or stabilizers that facilitate opening by 90 degrees on the inside and outside - or both. Discover the options!

Bathtub

What would you like to do today? Take a bath or take a shower?

Decide spontaneously and differently every day. Your KERMI bath screen instantly turns up almost any standard bathtub into a full shower. As the bath screen perfectly fits on the bathtub, almost any splashing water can get to the outside. You can select between an individual made to measure solution or a standard model. Available in a variety of versions, from reasonable Kerolan plastic glass to the elegant single sheet safety glass solution. As pivoting panel, comfortable sliding door or space-saving folding panel. Installation and maintenance — easy, clean and professional. As Kermi is known.

VARIO 2000

Versatile bathtub specialist.

Folding panels are ideal to turn instantly your bathtub into a shower area. And vice-versa. 1, 2 or 3 panels: You decide how comprehensive your splash protection should be. Vario 2000 suits almost any standard bathtub and even special productions are feasible. For the panel, you select the high-quality single sheet safety glass version or the robust Kerolan plastic glass. How about the optional KERMI**clean** easy care coating? You save lots of time and your glass panel is always shining brilliantly!

Vario 2000 two part folding panel on bathtub

Vario 2000 three part folding panel on bathtub

Cleaning: Simply fold your Vario 2000.

Perfect easy-care convenience:
The panels can be moved
outwards for cleaning

Solved brilliantly.

Foldable to the inside, pivoted to the outside, with magnetic closing - number of ideas are concealed in every KERMI bath screen. And solutions if the space situation is tricky. For instance, in case of slopes or if unevenness have to be compensated. The high-quality anodized aluminum profiles are a pleasure for the eyes. On request, can be mounted with or without side panel with ceiling support.

KERMIextra

This is made just for me.

Why should you be individual only for your clothes and hairstyle? With the KERMI**extra** special program, even your shower enclosure, your Walk-In or your bathtub screen can have your personal touch. Colorful surfaces, sandblasted decor glasses, integrated mirror surfaces, all conceivable combinations of profiles, hinges, handles are possible. Likewise, special installation solutions that are well-suited to your room situation. Only your fantasy can define the limits. We find solutions to fulfill your personal shower dream.

Colors are ideal for emphasizing the mood of your bathroom. Give your shower enclosure a personal touch! Using sanitary colors, you can match your shower enclosure in color to the ambience of your bathroom, for instance your KERMI bathroom radiator. The nature edition includes fresh, expressive colors. The ethno-shades are warm and earthy. Using the luxurious matt surfaces of the soft edition, you can enhance the high-quality optics of your bathroom. Stylish metallic surfaces set trendy accents. Additionally, all standard RAL colors are possible.

Color differences between printed and original colors are unavoidable due to technical reasons.

The sturdy single sheet safety glass of your KERMI shower enclosure is perfect for extensive designs. Whether with organic-looking nature designs or graphical, geometrical samples. We offer eleven sand-blasted graphic decorations for selection. You have an entirely personal favorite decor? We produce it within the realms of the technical options, either for the complete area or centered!

Decors

Stripe decor

Stone decor

Geometric decor

Arte decor

Line decor

Mare decor

Light decor

Fresh decor

Flame decor

Bamboo decor

Optionally, the decor patterns positioned on the center of the glass are also feasible for the entire area. The decor patterns on the entire surface of the glasses are also feasible at centered position.

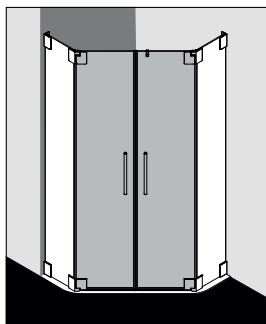

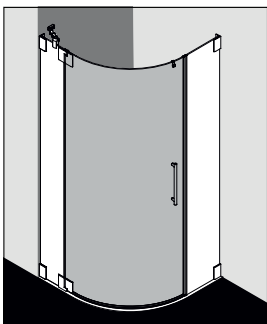

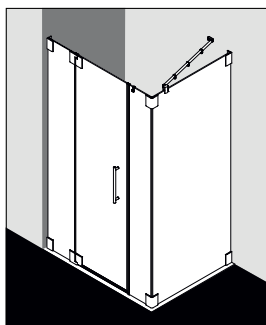

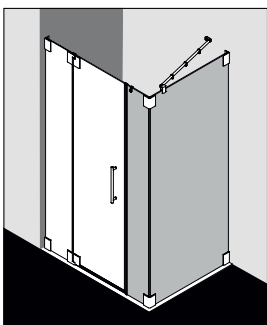

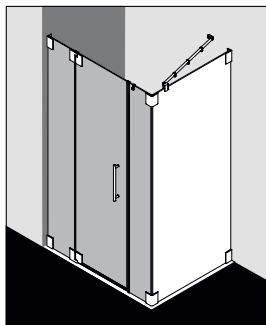

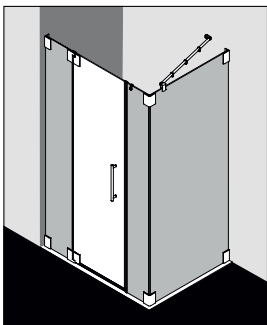

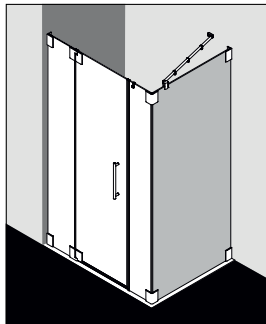

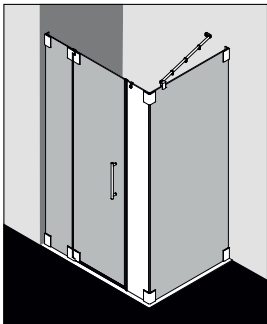

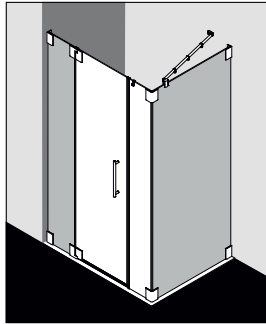

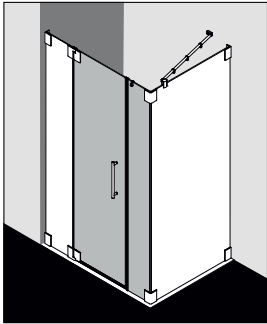

SANDBLASTED GLASS

Ideos decor

Examples

A smart solution: Use your shower enclosure as a mirror surface at the same time. High-quality KERMI mirror glass can be implemented with all straight single sheet safety glasses in 6 and 8 mm thickness. For the entire surface, on the fixed panel, on the door - depending on how much surface you want. KERMI mirror glass is a mirror without silver layer and multi-layer system containing chrome, corrosion-proof and resistant to steam and cleaning agents. One more highlight: In case the light in the room is brighter than the light in the shower enclosure, you can enjoy a free view to the outside. Can also be combined with an individual sandblasted decor and with **KERMiclean** easy care coating. Incidentally, minimal transparent points (so called pinholes) are completely normal. These may result due to the manufacturing process and are not a cause for any complaint.

Handle variants

Walk-In Filia WALL and fixed panel at 90° angle and WALL and Filia stabilizer, ESG stripe decor, with shower space Point

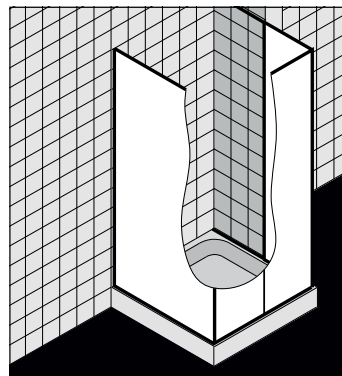

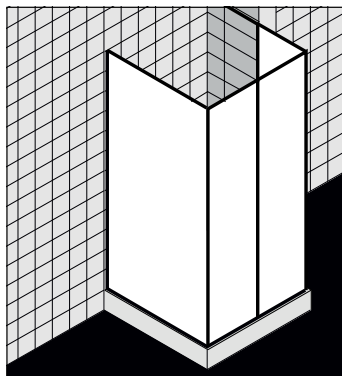

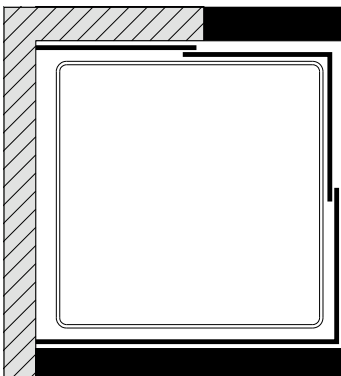

Examples

Walk-In XS WALL with ceiling support and Diga two-part corner entry (hinged doors with folding mechanism) in line with special connection profile for the ceiling support

Ibiza 2000 quadrant shower enclosure (hinged door with fixed panels). Fixed panel on the right hand side with diagonal cut, fixed panel on the left hand side with horizontal profile for connection to the washbasin

Ibiza 2000 two part corner entry (sliding doors) and side panel: fixed panel corner entry - half section to the right without glass with end-to-end top and bottom slide rail

If the extensive standard program is not sufficient to suit the requirements of your bathroom - no problem. Special program from KERMI**extra** is precisely for this purpose. You perhaps have a large enclosure with sophisticated surface design in mind for your luxurious bathroom. Or is there a tricky hurdle that has to be overcome e.g. a special cut-out or the slopes in your bathroom. We offer special technical solutions which cover almost any bathroom situation.

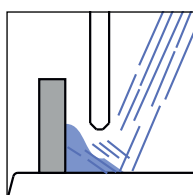

Honestly:

How important is pure optics for you?

Water find its way naturally. A physical law which we unfortunately cannot stop. What we can do: using precisely constructed profiles to keep the barriers as high as possible and thus achieve maximum water tightness. So that only minimal water is splashed outside. If you decide for a puristic solution without a profile, the barrier is omitted and it is unavoidable that one or the other water splash can get to the outside. In return, you enjoy the comfort of an entry without a threshold and elegant optics. As always with KERMI - you decide what is more important for you!

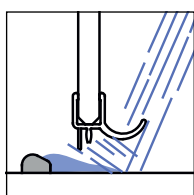

High profile

Unmatched in spray water tightness.

The bottom floor profile acts as a barrier against the shower stream occurring or splash water built up at the bottom edge of the tray. The higher the profile, the less danger that water can escape outside.

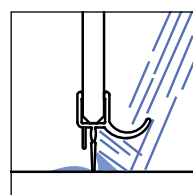

Flat profile

For satisfactory spray water tightness.

In principle, a flat floor sill means less protection from water splashing outside. KERMI compensates this with the specially coordinated, systematic arrangement of the sill, the gutter and the glass panel. Slim profiles and satisfying splash water tightness depending on the height of the floor sill - can thus be harmonized to a great extent.

No profile

With a significant limitation of the spray water tightness.

If there is no "profile barrier" or floor sill at the bottom of the enclosure, water can escape easily. Such being the case, an off-floor shower enclosure can only be a unique splash protection which cannot meet the highest demands for water tightness.

Can be installed with floor sill (height 6 mm) or without floor sill (off-floor).

A small floor sill is generally supplied with an off-floor shower enclosure in order to have an improved splash water tightness.

Kindly note!

KERMI shower enclosures are determined for installation on a bathtub or on a KERMI shower space. If installed in any other way, make sure that there is equivalent shower area (sealing for the floor screed, slopes, ...)!

In case of an installation on the joint, please make sure that it is a maintenance free and watertight joint.

If the shower enclosure is installed off-floor, all necessary steps must be taken on the site to prevent danger from slipping.

Overall look and construction influence the function.

A higher price does not automatically mean more water tightness.

KERMI shower enclosures with one or two droplet symbols (see the right side of the page) comply with EN 14428 and TÜV in terms of water tightness.

During the testing process, shower enclosures must provide protection against spraying water. Few, small water drops outside the shower enclosure are acceptable. Under the premise that the floor or the tub and the shower enclosure have been installed as per the regulations or the manufacturers instructions, test A and B are carried out successively with eleven liters of water/minute at max. 38° C.

Test A: Water is sprayed on the shower enclosures at an angle of 90° from a distance of 30 cm for one minute, whereas the spray area begins 30 cm from above and below.

Test B: Floor in the showering area is sprayed from a height of 1.90 meters and at a distance of 30 cm from the middle of the shower door for three minutes.

Your KERMI shower enclosure.

Perfect for sheer pleasure.

Your KERMI shower enclosure should give enormous pleasure. And less work.

All KERMI shower enclosures are constructed in accordance with this principle. Enjoy your refreshing pleasure! Afterwards, a few cleaning movements are enough in order to have a clean shower again. Water drips off from the profiles and insides of the panels. Mechanical parts like hinges and handles need little more attention - but you shall be grateful for the brilliant surface and best functionality. You shall find all necessary information in the maintenance and cleaning instructions that accompany every KERMI shower enclosure. Should a spare part be required, don't worry! You have 20 years after-sales guarantee for the spare parts. Even after the model has been discontinued. You see: We are serious about the long service life.

The "Teflo effect" for your shower enclosure.

The KERMI easy care coating for real glass is an ideal option if you desire less cleaning effort. The special surface coating prevents stubborn build up of dried water drops, soap residue, traces of dirt and lime. This also prevents germs and bacteria and thus ensures improved hygiene. This coating is certainly not a "wonder drug" that saves your maintenance efforts. But if you have no time even for this, that's not so bad. Compared to the non-stick coating of your fry pan, residues are removed easily. Another plus point: You require much less cleaning materials and this not only benefits your pocket but also the environment.

Following hygiene-technical assessment and microbiological tests carried out by an independent institute, KERMIclean has been certified as "suitable for use in all areas of the following facilities": hospitals, nursing homes, senior citizen's homes, schools, nurseries and similar institutions.

During the test, TÜV has certified durability of at least ten years.

Correct cleaning and maintenance of your shower enclosure ensures that you will enjoy many years of service from your KERMI shower enclosure. And the product code at the rear of the instructions or the identification code on the shower enclosure simplifies for e.g. the re-purchase of sealings.

The best parts of Kermi are lying ahead for you.

Such a brochure can certainly give you an initial overview but there is nothing like a consultation from a KERMI sanitary professional on site. There you can get a feeling of the material, designs and quality processing from KERMI and also have an opportunity to communicate all your desires in one personal meeting. Your KERMI specialist will be glad to set time aside to provide you with good ideas during the detailed planning.

When it comes to practical implementation, you are in best hands: Our specialized partners know precisely what is important for the proper installation of your KERMI solution. You can always rely on promptness, reliability and fairness.

To find a sanitary specialist partner of KERMI in your vicinity, you can get more information at **www.kermi.de** in the area shower design, subitem "sources of supply".

Technical specifications subject to change. We assume no liability for mistakes or printing errors. Product images are exemplary models, accessories shown with these models are not included in the scope of delivery. Color differences between printed and original colors are unavoidable due to technical reasons.

Attention: All KERMI shower enclosures are subject to test according to PPP 53005 (TÜV-/ GS-tested) and EN 14428 (CE). Large glass areas are occasionally subject to optical vibrations, which have no impact on the technical stability. Marks on the glass in the vaporized state (e.g. glass suction cups) are not a cause for any complaint. Single sheet safety glass may break spontaneously due to nickel sulphide content. This risk can be reduced via a heat soak test. But even the most modern tests (ESG-H) have shown that it is unfortunately not possible to sort out such panels 100% and that unavoidable residual risk always exists. Should such breakages occur, these are NOT a cause for any complaint. Guidelines / standards for the installation of electrical systems in their current version are observed during the installation of KERMI shower space and KERMI shower enclosure. General terms and conditions of KERMI GmbH are applicable.
